Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This Office Action is responsive to the amendment of 3/31/06.
2. Claims 1-10 and 12-25 directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 26-38, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, claims 26-38 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on 03/22/05 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. The indicated allowability of claim 11 is withdrawn in view of the newly discovered reference(s) to Faltum et al. (US Pub 2005/0103097). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by Faltum et al. (US 2005/0103097).

Regarding claim 11, Faltum discloses a gas sensor assembly (sensor for detection of substances in gases or liquids, see: page 6, paragraph 0094, see also page 1, paragraph 0009), comprising:

a substrate (substrate 21a)

a free-standing silicon carbide support structure (free hanging cantilever 31 is ring shaped) comprising:

at least one protruding support rising above the substrate (cantilever unit 31 protrudes from the pillar 32 to which it is connected, see: page 7, paragraph

0013, and page 5, 0069 andf 0072) and a lateral structure (surface stress

sensing element 33) contacting the protruding support (pillar 32), wherein the

lateral surface is coated with a layer of nickel or nickel alloy (the piezoelectric film may be lead nickel niobic acid (paragraph 0023), nickel manganin (paragraph 0024).

Art Unit: 2856

Allowable Subject Matter

6. Claims 1-10 and 12-38 are allowable over the prior art of record.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacques M. Saint-Surin whose telephone number is (571) 272-2206. The examiner can normally be reached on Mondays to Fridays between 10:30 A.M and 800 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (571) 272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
